Adjusting the display duration of a slide show

In this tutorial you can follow the step by step procedure for changing the display duration of images in a Nero Vision slide show. Furthermore, you can also define a default value for the transition duration as well as for the time span to comment start and after comment end.

Duration of a single image

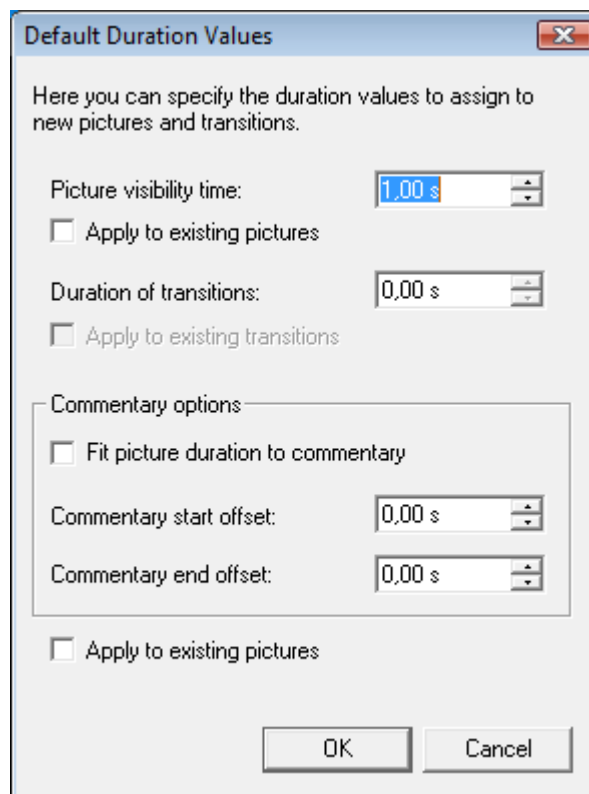

To adjust the display duration of a single image you will have to change its properties.

The following requirements have to be fulfilled:

- You have launched Nero Vision.
- You have gone into the **Slide show** screen to open a slide show for editing.

Proceed as follows to adjust the display duration:

1. Click the  button.
→ The **Default Duration Values** window opens.

Default Time Options window

- 2.** If you want to adjust the display duration of images:
 - 1.** Enter the required duration in seconds into the **Picture visibility time** input field.
 - The new display duration is adopted for all images which you add to the Contents area.
 - 2.** If you want the same display duration for all images in the compilation, check the **Apply to existing pictures** box.
 - The changes will be applied to all existing pictures.
- 3.** If you have inserted transitions and want to change the required duration of a transition:
 - 1.** Enter the required duration in seconds into the **Duration of transitions** input field.
 - The new display duration is adopted for all transitions which you add to the Contents area.
 - 2.** If you want the same display duration for all transitions in the compilation, check the **Apply to existing transitions** box.
 - The changes will be applied to all existing transitions.
- 4.** If you have inserted comments:
 - 1.** Check the **Fit picture duration to commentary** box to adjust the display duration of the image to the duration of the commentary.
 - 2.** If you want to display the image before the commentary plays back, enter the required time **Commentary start offset** input field.
 - 3.** If you want to display the image longer than the commentary plays back, enter the required time in the **Commentary end offset** input field.
 - The changes are adopted for all comments which you add to the Contents area.
 - 4.** If you want the changes to apply to all comments, check the **Apply to existing images** box.
 - The changes will be applied to all existing images.
- 5.** Click the **OK** button.
 - You have adjusted the display duration.
