Searching for Music Clips with Music Grabber

In this tutorial you can follow the step by step procedure how you can search for music clips in a Nero Vision capture. Recognized clips can be added to your compilation or saved separately from the video as a pure audio file. In the saving, Nero Vision supports the WAV and MP3 formats.

The following requirement has to be fulfilled:

- The desired video title appears in the **Movie** screen.

In order to search for music clips in a capture, proceed as follows:

1. Click the  button in the Content area.
 - The **Music Grabber** window will open.
2. If you wish to increase the sensitivity of your auto-recognition (**High**) or reduce it (**Low**), customize the slider.
3. Click the **Start** button.
 - The video file is searched for music clips.
 - The number of music clips is shown above the film strip. The individual music clips are highlighted on the film strip.
On the scroll bar in the preview area there are also shown the individual sequence start and end markings. Here fine corrections can be carried out if necessary.
4. If you wish to incorporate the found music clips into your compilation, click the **Add to Project** Button.
 - The found sequences will be cut out and inserted into your compilation.
5. If you wish to save the music clips as pure audio files:
 1. Click the **Save as a file** button and select the desired format.
 - A browser window opens.
 2. In the displayed directory tree select the desired storage place and click the **OK** button.
 - The Audio file is exported and saved.
 - You have searched for music clips in a capture.
