Adjusting image properties of a slide show

In this tutorial you can follow the step by step procedure for editing any image in your Nero Vision slide show.

The following requirements have to be fulfilled:

- You have launched Nero Vision.
- You have gone into the **Slide show** screen to open a slide show for editing.

Proceed as follows to adjust an image:

1. Select the required image in the Contents area and click the  button.
 - The **Properties** window opens and displays the **Picture properties** area and the **Picture** and **Commentary** tabs.

Properties window

The "Comments" Tab

The **Comments** tab is only available if an audio comment has been assigned to the required image.

Change several pictures

If you want to change the settings for several pictures at once, click the  icon. The **Properties** window then remains open and displays the settings for a picture when that picture is highlighted.

2. Enter the required display time in the **Duration** input field  in the
3. **Picture Properties** area.

Change duration

The input field displays the duration in the format **hours:minutes:seconds:hundredths of a second**. Click the group of digits that you would like to change and then click the  button.

4. If you have assigned an audio file to the image and if you want the duration of the display to reflect the length of the audio file, check the **Fit duration to commentary** box.

The check box "Fit duration to commentary"

The check box is only available if an audio file has been assigned to the image.

5. If you want to display text at the top of the picture, enter the desired text in the **Header text** input field.
6. If you want to display text at the bottom of the picture, enter the desired text in the **Footer text** input field.
7. If you have entered and want to adjust text:
 1. Select your desired font type from the large selection menu.
 2. Select the required font style in the upper small combo box and the font size in the lower small combo box.
 3. In the **Color** area, click in the color circle to define the color and color saturation for the text.
 4. Move the slider bar to the right next to the color area to adjust the color intensity.
8. If you have assigned an audio file to the image and want to adjust the file:
 1. Click the **Commentary** tab.
 2. Enter the display time of the image in the **Commentary start offset** input field  before playback of the audio file begins.
 3. If you have checked the **Fit duration to commentary** box in the **Picture properties** area, enter the display time of the image in the **Commentary end offset** input field  after playback of the audio file is done.
 4. Move the **Volume** slider to adjust the volume.

9. Click the  button.
 - The settings are applied.
 - You have customized an image to your requirements.
