## Creating a Season Pass® recording

In this tutorial you can follow the Step by step procedure for automatically recording all the episodes of a TV series using the Season Pass® feature in Nero LiquidTV™.

The easiest solution is to create a Season Pass® recording for a TV series with one of the series' episodes that is listed on the guide.

To create a Season Pass® recording proceed as follows:

1. Open the **Guide** screen.
2. Select, in the right area of the **Guide** screen, an episode from the TV series for which you want to create a Season Pass® recording. Say, you choose the episode "The Early Show".  
→ A program screen is displayed.
3. Select the **Get a Season Pass** button.  
→ The **Options** button is displayed.
4. Say, you want to edit the settings for the new Season Pass® recording. So use the **Options** button.  
→ The **Season Pass Options** screen is displayed.
5. Configure these options according to your preferences:
  1. For the **Channel** option, choose whether you prefer a particular channel or whether all channels should be taken into account. Say, you choose "Any channel". For the **Show types** option, choose whether only **broadcast premieres** or also **reruns** should be recorded. If you select the **All (with duplicates)** show type, any identical episodes that are broadcast at different times will also be recorded. Do so.
  2. For the **Keep at most** option, choose how many episodes should be recorded before the first recording is deleted in order to create more space for more recordings. If you select **All** here, nothing will be deleted - however, please bear in mind that this could lead to disk space problems on your computer in the case of long series. Select **All**.
  3. For the **Keep until** option, choose whether the recordings should be kept stored until **Disk space is required** or whether you alone should decide: **I delete**. Choose **I will delete**.
  4. For the **Start/Stop recording** option, choose whether or not the recording should start earlier/later and end earlier/late, as well as the time difference. Choose "Early – 4 min" and "Late – 4 min".
6. For the **Auto-convert** option, choose whether or not the recordings should be converted automatically. You can store them for portable playback devices or compress them to save storage space. Also specify whether the original file should be kept or deleted after the conversion. Choose **No**. As you have configured all the options according to your preferences, use now the **Create a Season Pass with these options** button.  
→ The **Options Confirmed** screen is displayed.  
→ You have created the desired Season Pass® recording. It is added at the end of the list on the **Season Pass Priority** screen and also listed on the **To Do List** screen. You can change its options again there if required.
